

Jeweler's Secret®

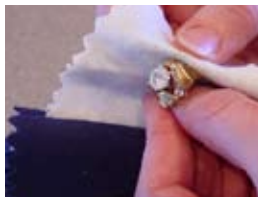

FOAMING JEWELRY CLEANER

Step 1: Inspection

Remove jewelry for best results. Inspect jewelry for loose stones or damaged prongs.

- * If damage is noticed take directly to a jeweler.
- * Do not clean over an open drain.

Step 2: Polish Metal Surface

Gently rub metal surface of jewelry with inner white Jewelry Care Cloth to remove oxidation.

Step 3: Buff Metal Surface

Buff metal surface by using the blue part of the Jewelry Care Cloth.

Step 4: Clean

Dispense 1-2 pumps of Jeweler's Secret Foaming Jewelry Cleaner onto jewelry.

Step 5: Agitate

Agitate entire piece of jewelry gently with the included jewelry brush.

- * Jewelry may become slippery.

Step 6: Rinse

Rinse entire piece of jewelry in clean water. Blot dry with a soft cloth.

- * Do not immerse watches under water, rinse only the watchband.

Step 7: Enjoy

Enjoy the renewed sparkle and shine. Jeweler's Secret is safe for all metals and most precious and semi-precious stones.

- * Not recommended for use on opals and pearls. These stones must be taken to a professional jeweler for cleaning.
